

We Make Cybersecurity Easier.

NuHarbor makes cybersecurity easier for our clients by understanding and eliminating the complexity and expense that make it hard. We deliver the most comprehensive set of integrated security services in the market by harnessing the best technologies available. Clients trust us to support a strong security operation and strategy.

Easy to Understand

Our security experts are trained to support and communicate in ways you can understand. Cybersecurity solutions are created to answer your questions on your terms.

Easy to Choose

We have an established reputation as security and technology leaders. With a clear definition of cybersecurity outcomes for your business, you can make the best decisions to secure your organization.

Easy to Trust

We deliver clear and consistent communication. Paired with our trusted operations and reporting, your stakeholders can have peace of mind in their cybersecurity decisions.

About Us

NuHarbor is a leading national cybersecurity services firm, supporting the diverse needs of hundreds of clients with clear, comprehensive, and outcome-based solutions. We deliver the most well-informed strategies for building, improving, and maintaining your security program.

- > Compliance, offensive testing, and award winning 24x7 managed security operations
- > Nationwide presence
- > Best-of-breed technology integrations
- > 100% U.S.-based staff
- > Expertise in state and local government and higher education (SLED)

Cybersecurity services you want from a team of experts you can trust.

NuHarbor integrates information from multiple telemetry sources to deliver holistic, targeted plans for building, improving, and maintaining cybersecurity programs. We strategically position technology with human expertise to create consistently successful outcomes and build trust with our clients.

Premium Managed Services

We work around the clock to ensure your critical security infrastructure provides maximal protection. We watch for new threats, sift through noisy data, and balance activity, impact, and urgency to deliver value.

Security Testing

Our Special Operations team trains and tests with the latest tools and techniques used by the most effective and malicious bad actors, developing a clear view of vulnerability that can't be uncovered any other way.

Assessment and Compliance

Understanding appropriate controls and configurations provides key information about adherence to internal and external policies. Whether to satisfy requirements of internal or industry audits, Compliance Services reduce the recurring burden of audit and assessment typically placed on an already overburdened security team.

Advisory and Planning

Our experts leverage visibility across hundreds of clients and an ever-growing inventory of threats to provide custom and actionable advice on operations planning, incident response, and project prioritization.
