MANAGED SERVICES

WHO IS TENABLE?

Tenable Network Security revolutionizes technology to adhere to modern business security needs. They provide vulnerability management tools that work to maximize network visibility and eliminate risks.

WHY NUHARBOR SECURITY?

Tenable's network security tools are robust and require upkeep by security experts. NuHarbor maximizes your organization's choice of Tenable products to facilitate peace of mind for your brand by:

- ✓ Managing Tenable's tools
- ✓ Maintaining your environment
- ✓ Monitoring your scans
- ✓ Delivering reports

With NuHarbor Security's Tenable Managed Services, we operate Tenable's intricate tools so you can focus on managing your business and feel at ease knowing your system is secure and being monitored.

OUR SOLUTION

Reporting

We'll provide data reports that demonstrate the full value of the platform.

Results Interpretation

We'll convey our vulnerability scan reports in a way that makes sense and pinpoints meaningful findings.

Remediation Guidance & Recommendations

We'll help you figure out what to do next to remediate vulnerabilities and reduce risks while saving you time and money.

Asset & Scan Configuration Management

We'll do all of the hard work when it comes to monitoring and managing scans of your company's assets.

Backend & Software Management

NuHarbor Security will maintain upkeep and technical troubleshooting for your Tenable Software.
